Dumps Questions 220-1001

Exam Name: CompTIA A+ Certification Exam: Core 1

Certification Provider: CompTIA

Exam: CompTIA A+ Certification Exam: Core 1

- Single Topic

Question #1

SIMULATION -

Laura, a customer, has instructed you to configure her home office wireless access point. She plans to use the wireless network for finances and has requested that the network be setup with the highest encryption possible. Additionally, Laura knows that her neighbors have wireless networks and wants to ensure that her network is not being interfered with by the other networks. She requests that the default settings be changed to the following.

Wireless Name: HomeWiFi -

Shared Key: CompTIA -

Router Password: Secure\$1 -

Finally, Laura wants to ensure that only her laptop and Smartphone can connect to the network.

Laptop: IP Address 192.168.1.100

Hardware Address: 00:0A:BF:03:C4:54

Smartphone: IP Address 192.168.1.101

Hardware Address: 09:2C:D0:22:3F:11

INSTRUCTIONS -

Configure Laura's wireless network using the network adapter window.

If at any time you would like to bring back the initial state of the situation, please click the Reset All button.

Correct Answer: See the explanation below

The image shows a 'Wireless Configuration' window with three tabs: 'Wireless Setup', 'Network Filter', and 'Administrator Tools'. The 'Wireless Setup' tab is active. The window is divided into three sections: 'WIRELESS NETWORK SETTINGS:', 'WIRELESS SECURITY MODE:', and 'WPA2:'. In the 'WIRELESS NETWORK SETTINGS:' section, 'Enable Wireless' is checked, 'Wireless Network Name' is 'HomeWiFi', 'Wireless Channel' is '1', 'Disable SSID Broadcast' is unchecked, and '802.11g Only Mode' is unchecked. In the 'WIRELESS SECURITY MODE:' section, 'Security Mode' is set to 'Enable WPA2 Wireless Security (enhanced)'. In the 'WPA2:' section, both 'Passphrase' and 'Confirmed Passphrase' are 'CompTIA'. A 'Save Settings' button is located at the bottom right.

Question #2

DRAG DROP -

Drag each mobile technology to the description of its use. Some answers will not be used.

Select and Place:

Description	Wireless technology
Devices use haptic confirmation for sharing data wirelessly.	NFC
Devices are paired using a code for sharing data wirelessly.	Hotspot
Devices are placed in close proximity within line of sight for sharing data wirelessly.	IR
Devices are connected via a wire for sharing data or connectivity.	Tethering
	Bluetooth
	Cellular
	Lightning

Correct

Answer:

Description	Wireless technology
IR	
Bluetooth	Hotspot
NFC	
Tethering	
	Cellular
	Lightning

Question #3

DRAG DROP -

A customer, Ann, has requested two custom PCs, one to be used for gaming and the other to be used as a virtualization workstation for her business.

The gaming PC should support the latest games and gaming peripherals.

The virtualization workstation should be able to host several production virtual machines as part of Ann's home business.

INSTRUCTIONS -

Use the tabs at the top to switch between the PCs.

Objects should be placed on the appropriate slot/display areas and can only be used once.

All slot/display areas should be filled.

Correct Answer:

Question #4

SIMULATION -

The network administrator has changed the IP address of ComputerA from 192.168.1.20 to 10.10.10.20 and now jane, a user, is unable to connect to file shares on ComputerA from ComputerB using the computer name.

INSTRUCTIONS -

Using the available tools, resolve the connectivity issues.

After troubleshooting the issue, verify a successful connection.

If at any time you would like to bring back the initial state of the simulation? please click the Reset All button.

```

Correct Answer: See the explanation below

We need to flush the DNS to have the new IP address assigned to the same computer name. Use the ipconfig/flushdns command.

Question #5

A technician is troubleshooting what appears to be a RAM issue on a PC. Which of the following symptoms would indicate if this is a RAM issue?

A. POST code beeps

B. Distended capacitors

C. Continuous reboots
