Microsoft

Dumps Questions MS-900

Total Q&A: 129

Exam Name: Microsoft 365 Fundamentals

**Guaranteed success with Our Dumps Questions**

Certification Provider: Microsoft

Exam: Microsoft 365 Fundamentals

Duration: 2 Hours

Number of questions in the database: 129

Question #1

DRAG DROP -

You are implementing Azure cloud services.

Match each scenario to its service. To answer, drag the appropriate scenario from the column on the left to its cloud service on the right. Each scenario may be used only once.

NOTE: Each correct selection is worth one point.

Select and Place:

Scenarios	Answer Area								
Exchange Online integrated with on-premises Exchange Server 2019	<table border="1"><thead><tr><th>Service</th><th>Scenario</th></tr></thead><tbody><tr><td>Software as a service (SaaS)</td><td>Scenario</td></tr><tr><td>Platform as a service (PaaS)</td><td>Scenario</td></tr><tr><td>Infrastructure as a service (IaaS)</td><td>Scenario</td></tr></tbody></table>	Service	Scenario	Software as a service (SaaS)	Scenario	Platform as a service (PaaS)	Scenario	Infrastructure as a service (IaaS)	Scenario
Service	Scenario								
Software as a service (SaaS)	Scenario								
Platform as a service (PaaS)	Scenario								
Infrastructure as a service (IaaS)	Scenario								
Custom web and mobile application securely connected to an on-premises data store									
Server-based workloads on a virtual machine that are connected to an on-premises network									

Correct

Answer:

Scenarios	Answer Area								
Exchange Online integrated with on-premises Exchange Server 2019	<table border="1"><thead><tr><th>Service</th><th>Scenario</th></tr></thead><tbody><tr><td>Software as a service (SaaS)</td><td>Exchange Online integrated with on-premises Exchange Server 2019</td></tr><tr><td>Platform as a service (PaaS)</td><td>Custom web and mobile application securely connected to an on-premises data store</td></tr><tr><td>Infrastructure as a service (IaaS)</td><td>Server-based workloads on a virtual machine that are connected to an on-premises network</td></tr></tbody></table>	Service	Scenario	Software as a service (SaaS)	Exchange Online integrated with on-premises Exchange Server 2019	Platform as a service (PaaS)	Custom web and mobile application securely connected to an on-premises data store	Infrastructure as a service (IaaS)	Server-based workloads on a virtual machine that are connected to an on-premises network
Service	Scenario								
Software as a service (SaaS)	Exchange Online integrated with on-premises Exchange Server 2019								
Platform as a service (PaaS)	Custom web and mobile application securely connected to an on-premises data store								
Infrastructure as a service (IaaS)	Server-based workloads on a virtual machine that are connected to an on-premises network								
Custom web and mobile application securely connected to an on-premises data store									
Server-based workloads on a virtual machine that are connected to an on-premises network

#### Question #2

You need to identify which Microsoft platforms provide hybrid capabilities for migrating from an on-premises deployment.

Which two platforms provide hybrid capabilities for migration? Each correct answer provides a complete solution. (Choose two.)

NOTE: Each correct selection is worth one point.

- A. Microsoft Skype for Business
- B. Microsoft Yammer
- C. Microsoft Exchange
- D. Microsoft Teams

Correct Answer: AC

#### Question #3

A company is moving to Microsoft Azure. Some applications cannot be moved.

You need to identify which applications will remain in a hybrid environment after the migration.

Which applications will remain in a hybrid environment?

- A. applications that manage sensitive information
- B. applications that use a USB-token device to control access
- C. legacy applications that use a message-based interface
- D. a new server that runs several line-of-business applications

Correct Answer: A

#### Question #4

HOTSPOT -

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area		
Statement	Yes	No
Microsoft cloud services offer significant energy savings for Microsoft and its customers.	<input type="radio"/>	<input type="radio"/>
Lower costs, no hardware maintenance, near-unlimited scalability, and high reliability are all advantages of a private cloud.	<input type="radio"/>	<input type="radio"/>
Microsoft cloud services offer security options and have the ability to provision resources quickly.	<input type="radio"/>	<input type="radio"/>

Correct

Answer:

Answer Area		
Statement	Yes	No
Microsoft cloud services offer significant energy savings for Microsoft and its customers.	<input checked="" type="radio"/>	<input type="radio"/>
Lower costs, no hardware maintenance, near-unlimited scalability, and high reliability are all advantages of a private cloud.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft cloud services offer security options and have the ability to provision resources quickly.	<input checked="" type="radio"/>	<input type="radio"/>

Question #5

DRAG DROP -

You are the Microsoft 365 administrator for a company.

You must provide infrastructure recommendations. All proposed solutions must minimize costs.

You need to identify the appropriate cloud model for the given scenarios.

Which cloud models should you use? To answer, drag the appropriate cloud models to the correct requirements. Each cloud model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Correct Answer: Explanation
